Description

Dark purple spring foliage with visible black veins in the spring of the most beautiful effect, during the summer the foliage becomes dark with new bright red shoots and in autumn orange-red color. Large sheet of +- 5/8 cm wide at maturity.

One of the most beautiful varieties of the last 15 years. Unique in its kind for its vigor and its robustness, supports the full sun but will be more intense in colors in a semi-shaded place. Obtained from the USA of Talon Buchholz Oregon. Another of my favorites for its vigor, its brilliant color will delight all gardeners. New introduction in Europe Guy MAILLOT

Technical description

<i>Species</i>	Acer amoenum
<i>Variety</i>	Dark knight
<i>Leaf colour</i>	Veined
<i>Leaf shape</i>	Palmated
<i>Adult height</i>	Between 2 and 4 meters
<i>Shape</i>	Natural
<i>Exposure</i>	Partial shade
