Description

Multi-purpose medium grain bonsai soil used to grow many species.

Grain size Ø +- 2/3 et 4 mm. 2 bags +- 14 litres, total +- 28 litres. SUPERIOR QUALITY, DRIED FOR MORE THAN 2 YEARS. Weight according to the rate of moisture of 8.15 kilograms.

Origin: natural volcanic earth from the mountainous regions of Japan.

Benefits: soil drainage and root ventilation for the healthy growth of your bonsai.

How to use: use alone or add gravel and large-grained sand but not compost. This earth is not very nourishing and a Biogold fertiliser should be used regularly. You'll need to water this large-grained soil more in summer.

Species: for all deciduous trees, conifer and caduc trees (for rhododendrons and azaleas you'll need Kanuma earth).

Please kindly note that this is a heavy product to send and we charge extra for postage. We pay ttc 27.43 euros to send two bags of earth through the post office.
